**INNOVATION R&D CUSTOMIZATION**  
**FOCUS ON LED LANDSCAPE LIGHTING**

# MINALOX

If there is no light, our world will be overshadowed by ~.

Light that our world gorgeous ~.

Urban night for lighting and energetic ~.

Space for lighting becomes profusion is colorful ~.

## TECHNICAL PARAMETERS

## INSTALLATION

# LED LINEAR LIGHT

## MLX-XTD-I4800

### PRODUCT FEATURES

Original structure design, overall simplicity, exquisite and beautiful, seamless but no dark area, structural waterproof and no glue process, IP66,

6063 aluminum lamp body, SUS304 stainless steel screw fastening, multiple installation methods, surface outdoor electrostatic spray coating, strong corrosion resistance, suitable for harsh outdoor environments.

Equipped with imported CREE / OSRAM light source, it has excellent light color performance, and adopts high light transmission solid acrylic rod, which effectively improves the uniform light mixing of the lamp without dark areas.

Monochrome / RGBW 4-in-one, support DMX512 control system, automatic addressing, concise wiring, making the nstallation and imaintenance of lamps more convenient and fast.

### TECHNICAL PARAMETERS

- Input Voltage: DC24V
- Electrical Safety Rating: Ⅲ
- LED Source: CREE/OSRAM
- Driver: Constant voltage driver
- Control Method: ON-OFF/DMX512
- Beam angle: 110°
- Weight: 0.8Kg
- Size: L1000\*W28\*H46mm

ITEM	POWER	LED QTY	COLOR	VOLTAGE	LED	IP GRADE

### PRODUCT FEATURES

Original structure design, overall simplicity, exquisite and beautiful, seamless but no dark area, structural waterproof and no glue process, IP66,

6063 aluminum lamp body, SUS304 stainless steel screw fastening, multiple installation methods, surface outdoor electrostatic spray coating, strong corrosion resistance, suitable for harsh outdoor environments.

Equipped with imported CREE / OSRAM light source, it has excellent light color performance, Adopt high-quality optical grade light guide plate, through precision laser engraving dot design, to achieve uniform light diffusion, no dark area, no glare, soft light effect.

Monochrome / RGBW 4-in-one, support DMX512 control system, automatic addressing, concise wiring, making the installation and maintenance of lamps more convenient and fast.

### TECHNICAL PARAMETERS

Input Voltage: DC24V  
Electrical Safety Rating: Ⅲ  
LED Source: CREE/OSRAM  
Driver: Constant voltage driver  
Control Method: ON-OFF/DMX512  
Weight: 1.9Kg

# LED LINEAR LIGHT

## MLX-XTD-Y4800

### PRODUCT FEATURES

Original structural design, the overall appearance is simple, exquisite and beautiful. Fully potted glue waterproof design, protection grade IP66.

6063 aluminum alloy lamp body, fastened with SUS304 stainless steel screws, multiple installation methods, outdoor grade electrostatic spraying on the surface, strong corrosion resistance, suitable for harsh outdoor environments.

Equipped with CREE/OSRAM imported light source, it has excellent light and color performance. The use of high-transmittance 4mm diamond-shaped tempered glass effectively improves the uniform light mixing effect of the lamp.

Monochrome/RGBW 4-in-one, supports DMX512 control system, automatic addressing.

Simple wiring makes the installation and maintenance of lamps more convenient and faster.

### TECHNICAL PARAMETERS

Input Voltage: DC24V

Electrical Safety Rating: III

LED Source: CREE/OSRAM

Driver: Constant voltage driver

Control Method: ON-OFF/DMX512

# LED FLOOD LIGHT MLX-TGD-I0603

## PRODUCT FEATURES

Unique multi-point compression type integrated waterproof patent structure, 100% glue free structure, IP66.

High conductivity aluminum radiator, ventilation and convection design. The lamp body is miniaturized and the power is large. SUS304 stainless steel screw bracket is equipped with a dial and has the function of gear locking.

The lamp body adopts a unique design concept, with smooth arc, simple and natural shape. The self leveling design of the lamp surface ensures that there is no deposition of foreign matters on the surface; avoid the later maintenance and cleaning of the lamp.

Equipped with Cree / OSRAM / Philips high-power light source, it has excellent light and color performance. Temperature resistant, high transparent, flame-retardant optical lens, with built-in anti glare column technology; minimize glare and stray light, optional with built-in bee net anti glare grid.

## CURVE

## INSTALLATION

# LED FLOOD LIGHT MLX-TGD-I1803

## PRODUCT FEATURES

Unique multi-point compression type integrated waterproof patent structure, 100% glue free structure, IP66.

High conductivity aluminum radiator, ventilation and convection design. The lamp body is miniaturized and the power is large. SUS304 stainless steel screw bracket is equipped with a dial and has the function of gear locking.

The lamp body adopts a unique design concept, with smooth arc, simple and natural shape. The self leveling design of the lamp surface ensures that there is no deposition of foreign matters on the surface; avoid the later maintenance and cleaning of the lamp.

Equipped with Cree / OSRAM / Philips high-power light source, it has excellent light and color performance. Temperature resistant, high transparent, flame-retardant optical lens, with built-in anti glare column technology; minimize glare and stray light, optional with built-in bee net anti glare grid.

## TECHNICAL PARAMETERS

Input Voltage: AC100V-250V50HZ/DC24V

Electrical Safety Rating: I /Ⅲ

LEDSource: CREE

Driver: Constant current driver

Control Method: ON-OFF/DMX512

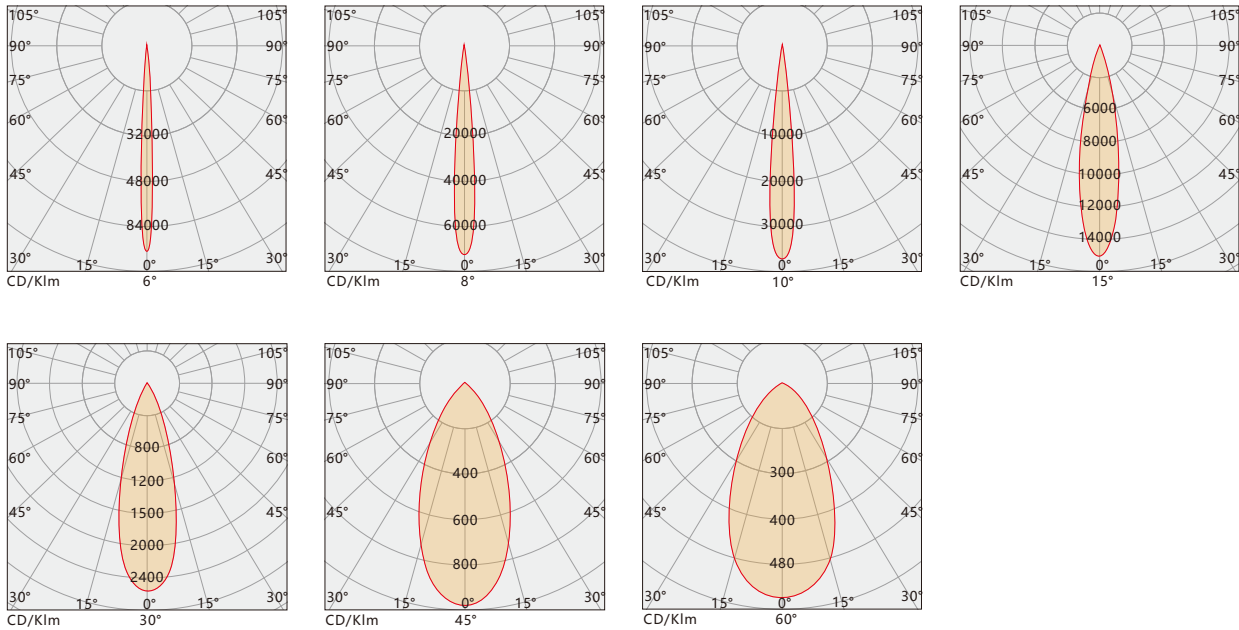

Beam angle: 6°/8°/10°/15°/30°/45°/60°

Weight: 3.8Kg

Size: φ190\*H260mm

# LED FLOOD LIGHT MLX-TGD-K0303

## PRODUCT FEATURES

It adopts the traditional waist drum arc appearance design, perfect combination of aesthetic form and product function, inner cavity heat dissipation, full structural waterproof design without glue filling, IP66.

Die cast aluminum lamp body, SUS304 stainless steel screw, bracket equipped with dial, with gear locking function. Surface electrostatic spraying, strong corrosion resistance, suitable for harsh outdoor environment.

Equipped with Cree / OSRAM imported light source, it has excellent light color performance. High transparent and flame-retardant optical devices, with built-in anti glare column treatment, effectively reduce the stray light and glare.

Monochrome / RGBW 4-in-one full color control, supporting DMX512 control system. Brand power supply, with good electromagnetic compatibility, will not cause electromagnetic interference to the surrounding environment.

## TECHNICAL PARAMETERS

### PRODUCT FEATURES

It adopts square appearance design, simple and generous, exquisite and beautiful lamp type. Full structure waterproof without glue process, protection grade IP66.

6063 aluminum alloy extruded lamp body and die-cast aluminum top cover. The bracket is equipped with a dial and has a gear lock function. The surface is electrostatic sprayed and has strong corrosion resistance, suitable for harsh outdoor environments.

Equipped with imported CREE / OSRAM light source, has excellent light color performance. High transmittance conjoined optical lens, which can effectively improve the light output efficiency of the lamp.

Monochrome / RGBW 4-in-one full-color control, support DMX512 control system. Brand power supply, with good electromagnetic compatibility, will not cause electromagnetic interference to the surrounding environment.

# LED FLOOD LIGHT MLX-TGD-JA1603

## PRODUCT FEATURES

Unique multi-point compression type integrated waterproof patent structure, 100% glue free structure, IP66.

High conductivity aluminum radiator, ventilation and convection design. The lamp body is miniaturized and the power is large. SUS304 stainless steel screw bracket is equipped with a dial and has the function of gear locking.

The lamp body adopts a unique design concept, with smooth arc, simple and natural shape. The self leveling design of the lamp surface ensures that there is no deposition of foreign matters on the surface; avoid the later maintenance and cleaning of the lamp.

Equipped with Cree / OSRAM / Philips high-power light source, it has excellent light and color performance. Temperature resistant, high transparent, flame-retardant optical lens, with built-in anti glare column technology; minimize glare and stray light, optional with built-in bee net anti glare grid.

Unique multi-point compression type integrated waterproof patent structure, 100% glue free structure, IP66.

High conductivity aluminum radiator, ventilation and convection design. The lamp body is miniaturized and the power is large. SUS304 stainless steel screw bracket is equipped with a dial and has the function of gear locking.

The lamp body adopts a unique design concept, with smooth arc, simple and natural shape. The self leveling design of the lamp surface ensures that there is no deposition of foreign matters on the surface; avoid the later maintenance and cleaning of the lamp.

Equipped with Cree / OSRAM / Philips high-power light source, it has excellent light and color performance. Temperature resistant, high transparent, flame-retardant optical lens, with built-in anti glare column technology; minimize glare and stray light, optional with built-in bee net anti glare grid.

## TECHNICAL PARAMETERS

Input Voltage: AC100V-250V50HZ

Electrical Safety Rating: I

LED Source: CREE/OSRAM

Driver: Constant current driver

Control Method: ON-OFF

Beam angle: 3°/6°/8°/10°/15°/30°/45°/60°

Weight: 4.9Kg

Size: L470\*W150\*H153mm

# LED FLOOD LIGHT MLX-TGD-DB21601

## PRODUCT FEATURES

Unique design, simple and elegant, exquisite and beautiful light type. Full structure waterproof without glue process, IP66.

6063 aluminum alloy extruded lamp body and diecast aluminum plug cover, SUS304 stainless steel screw fastening bracket. The surface is electrostatic sprayed and has strong corrosion resistance, suitable for harsh outdoor environments.

Equipped with imported CREE / OSRAM light source, has excellent light color performance. High light transmittance optics can effectively improve the light output efficiency of the lamp.

Monochrome / RGBW 4-in-one full-color control, support DMX512 control system. Brand power supply, with good electromagnetic compatibility, will not cause electromagnetic interference to the surrounding environment.

## MLX-TSD-E0602

### PRODUCT FEATURES

Unique design, simple and elegant, exquisite and beautiful light type. Full structure waterproof without glue process, IP66.

Die-cast aluminum lamp body, outdoor grade electrostatic spraying, strong corrosion resistance, suitable for harsh outdoor environment.

Equipped with imported CREE light source, with excellent light color performance. Independent research and development of arc-shaped linear spot optics, effectively improving the light color effect of lamps in application places.

Monochrome / RGBW, support DMX512 control system, simple wiring, make the installation and maintenance of lighting more convenient and fast.

### TECHNICAL PARAMETERS

Input Voltage: AC100V-250V50HZ/DC24V

Electrical Safety Rating: I /Ⅲ

LED Source: CREE

Driver: Constant current driver

Control Method: ON-OFF/DMX512

Beam angle: 6°\*180°

Weight: 0.6Kg

Size: L130\*W52\*H95mm

# LED WALL LIGHT MLX-TSD-I0205

## PRODUCT FEATURES

The traditional square design is adopted, and the overall appearance is simple and elegant, exquisite and beautiful. The full structural waterproof design does not require glue injection, and the protection level is IP66.

Die-cast aluminum body, stainless steel bracket, 4mm high light transmittance tempered glass, outdoor grade electrostatic spraying, strong corrosion resistance, suitable for harsh outdoor environment.

Equipped with CREE/COB imported light source, with excellent light color performance. High transmittance, flame retardant optical components, with built-in anti-glare technology, effectively reduce stray light and glare.

Support DMX512 control system. Brand power supply, with good electromagnetic compatibility, will not cause electromagnetic interference to the surrounding environment.

## PRODUCT FEATURES

Deep light output design, full glue-filled waterproof process, can be submerged in water for a long time, no water accumulation on the lamp body, no water droplets left when heating, protection level IP68.

It adopts 304 stainless steel thickened lamp body and 304 stainless steel cover, which has strong corrosion resistance and high impact resistance; 8mm tempered glass has good light transmittance and high compressive strength.

Equipped with CREE imported light source, high brightness, energy saving, stable performance and long-lasting durability.

The internal and external circuits are reasonably designed, using 24V safe voltage, high safety, and effective prevention of leakage. They are widely used in fountains, swimming pools, artificial lakes and other waterscape lighting and decoration.

# LED UNDERGROUND LIGHT MLX-DMD-G0303

## PRODUCT FEATURES

Bevel polarized design, realizing no direct light at short distances, structural waterproof and no glue process, IP67.

Die-cast aluminum thickened body, 304 stainless steel cover, 8mm tempered glass, outdoor surface electrostatic spraying, strong corrosion resistance, suitable for harsh outdoor environment.

Equipped with imported CREE / OSRAM light source, has excellent light color performance. High-permeability, flame-retardant optics, built-in anti-glare honeycomb network, effectively reduce the glare of the light.

Monochrome / RGBW four-in-one fullcolor control, support DMX512 control system. Brand power supply, with good selectromagnetic compatibility, will not cause electromagneticinterference to the surrounding environment.

## TECHNICAL PARAMETERS

Input Voltage: AC100V-250V50HZ/DC24V

Electrical Safety Rating: I /Ⅲ

LED Source: CREE/OSRAM

Driver: Constant current driver

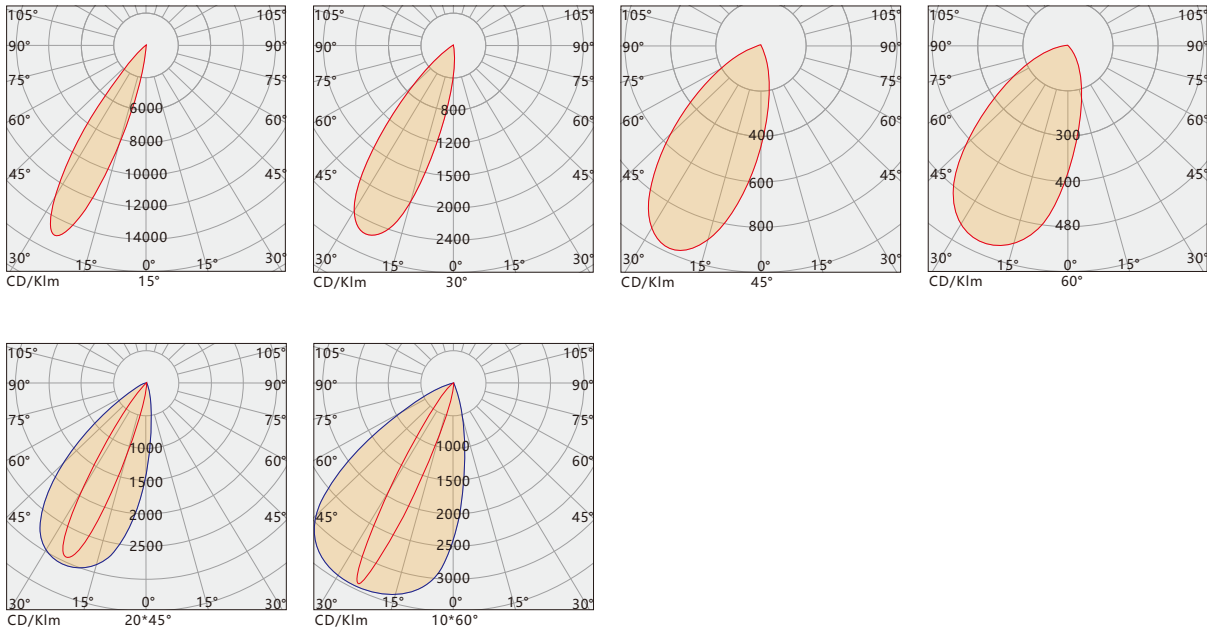

Control Method: ON-OFF/DMX512

Beam angle: 15°/30°/45°/60°/10°60°/20°45°

Weight: 1.2Kg

Size: φ120\*H120mm

## CURVE

## PRODUCT FEATURES

Made of 6063 aluminum, it has a beautiful appearance and a reasonable optical design that evenly distributes the light, providing a suitable and stable light intensity, effectively illuminating the road and surrounding areas.

The surface is outdoor anodized, which can adapt to different climate conditions, has high strength and strong corrosion resistance, and is suitable for harsh outdoor environments.

Equipped with OSRAM imported light source, it has excellent light color performance. Highly transparent, flame-retardant optical devices, waterproof and dustproof.

With standardized installation interfaces and methods, it can be quickly and easily installed at appropriate locations on the sides of various roads, saving installation time and labor costs.

### CURVE

### PRODUCT FEATURES

Made of 6063 aluminum, it has a beautiful appearance and a reasonable optical design that evenly distributes the light, providing a suitable and stable light intensity to effectively illuminate the tunnel.

The surface is outdoor anodized, which can adapt to different climate conditions, has high strength and strong corrosion resistance, and is suitable for harsh outdoor environments.

Equipped with OSRAM imported light source, it has excellent light color performance. Highly transparent, flame-retardant optical devices, waterproof and dustproof.

With standardized installation interfaces and methods, it can be quickly and easily installed at the appropriate location in the tunnel, saving installation time and labor costs.

### TECHNICAL PARAMETERS

Input Voltage: AC100V-250V50HZ

Electrical Safety Rating: I

LED Source: OSRAM

Driver: Constant current driver

Control Method: ON-OFF

Beam angle: 70°\*150°/90°\*160°

Weight: 3.8Kg

Size: L440\*W260\*H168mm

### INSTALLATION

# LED EAVES LIGHT MLX-DGD-A30

## PRODUCT FEATURES

The shell is made of flame-retardant and weather-resistant engineering transparent PVC. It is small and exquisite in appearance, fashionable and simple, with various shapes, strong and durable. It can meet different architectural styles and decoration requirements, and can adapt to different climatic conditions. The protection level is IP67.

The independent lens with high transparency design has excellent light output performance and soft light output, which can create a warm atmosphere, add beauty to the building, provide appropriate amount of light, meet the lighting needs at night, and is not dazzling.

The intelligent control function is strong, and it can achieve various signal effects such as push, gradient, jump, image, etc. through infrared, voice control, Bluetooth, WIFI, APP remote control, etc.

## TECHNICAL PARAMETERS

- Input Voltage: DC24V
- Electrical Safety Rating: Ⅲ
- LED Source: SAN AN
- Driver: Constant voltage driver
- Control Method: Button+ Remote Control+APP
- Beam angle: 120°
- Weight: 1.2Kg
- Size: L40\*W30\*H14mm
